Other Boards Favoring PACE

California

New Jersey

Virginia

Delaware

New York

Washington

Maryland

At various points in time board members from the above jurisdictions have expressed their support for the PACE program and indicated they favored amending applicable statutes, rules, or regulations to accept PACE providers. The Federation recognizes that individual member opinions do not reflect the official position of the board until formal regulatory changes have been adopted, and that board membership changes over time.

PACE Acceptance by boards is defined as recognizing the criteria of PACE as sufficient to meet board standards so that PACE-Recognized providers may receive CE course credit approval without individual course application and fee submission. Note that specific subjects may be prohibited by board statute, rule, or regulation.
